Installation

GRAVEDA® GRASPRESSO®

Registered Trade Mark

Registered Trade Mark

Check the power voltage before using the device. The correct voltage is 220-240V/50Hz. Do not set the temperature above 235°C.

The operating temperature is between 0°C and 235°C.

You can set the temperature in degrees Celsius.

Plug the power cord into the device. Plug the power cord into the socket. Turn the press on using the on/off switch. The control panel lights up.

Installation

GRAVEDA® GRASPRESSO®
Registered Trade Mark Registered Trade Mark

Place the prepared material in the center of the base plate.
The lever (depending on the model) is used to push the cylinder upwards until the desired pressure is reached.

Wait until the countdown is finished and the press starts beeping.
Press the timer button again to turn off the timer and stop the beeping.

Open the press using the button, lever or pressure release screw.
(Je nach Modell)

Never put your hands or fingers between the two heating plates!
Risk of injury! Risk of burns! Never leave children unattended near the press!
Remove the pressed material using heat-resistant gloves or tools and proceed
with great care
before.

Make sure the heating plates have cooled down completely before cleaning.
Clean the heating plates regularly. Apply a small amount of alcohol to a clean cloth and clean the plates. It is best to use at least 80% isopropyl alcohol by volume.

Clean the plates with a clean, dry cloth.
Repeat these steps to clean all associated components.

Always switch off the press when you have finished using it!
