We offer a free warranty service only during normal use of the device

We do not accept any liability for damage or injury to you or third parties caused by incorrect use or connection of the press to your existing air compressors. We do not accept liability for damage to you or third parties caused by improper or incorrect or intentional misuse of the press.

The warranty does not cover accessories such as the glass plate, glass insert or wear and tear of the battery. The warranty does not apply if the damage to the article is due to forcible use/maintenance.

Spare parts are available at cost price from GRAVEDA® support at [info@graveda.de](mailto:info@graveda.de).

Please pack the device well when sending it in for repair.

Please tell us as exactly as possible which problems you have with your product so that we can react quickly.

It is important to us that you can leave our house as a satisfied customer!

---

The following precautions are designed to prevent accidents and injuries to yourself and others. Please ensure that you read, understand and follow these precautions thoroughly before using the product.

If the product appears to be damaged or there is obvious damage or malfunction, please contact GRAVEDA® Customer Service immediately at [info@graveda.de](mailto:info@graveda.de)

- Never touch the hot plates or put your finger between them. There is a danger of burns and crushing!
- Make sure that the device is always kept clean and free of dust.
- Always connect the power plug to the appliance first and only then to the power outlet.
- Before disconnecting the appliance from the power supply, make sure that the appliance is switched off.
- The appliance is supplied with a power cord. DO NOT attempt to charge the unit with any other power cord/USB or otherwise without proper grounding.
- Always turn the power off when you are not using the unit.

# Safety Instructions

- Use this product only as described in this manual.
- Always keep the product out of the reach of children.
- Always turn the appliance off and let it cool down completely before cleaning, servicing or repairing. 
- DO NOT immerse the appliance, power cord or plugs in water or any other liquid.
- DO NOT place the product on or near a gas or electric burner, heated stove, or other heat source.
- DO NOT operate the product with a damaged cord or USB cable or plug.
- DO NOT leave any cables near a heat source. It may deform the cable or melt the insulation and cause electric shock or fire.
- Always insert the USB charging cable completely. 
- DO NOT touch the power plug, cable or device with wet hands.
- If you need to unplug the power cord, unplug it by the plug and not by the cord itself. The cable could otherwise be damaged!
- Do not scratch, cut, twist, bend, tie or place a heavy object on the cable.
- DO NOT drop the power cord over the edge of the table where it could be accidentally bent or someone could trip over it. 
- DO NOT connect too many power plugs to the same power outlet.
- DO NOT operate the product after the product has malfunctioned if it has been dropped or damaged in any way.
- DO NOT cover the product with a cloth. Doing so may result in heat and fire.
- Always keep the product out of the reach of children.

**ATTENTION:** Always keep the packaging material (cardboard, foils, polystyrene, plastic bags and straps) out of reach of children!  
There is danger of suffocation and strangulation.

Always keep the outer carton; it is suitable and designed for the proper transport of the unit and for stowing away. Only use this original carton for returns.

1. Place the box on a straight, stable surface
2. Open the box carefully! With scissors or a knife.
3. Remove the operating instructions and all other loose accessories
4. Remove the packaging materials and carefully take the device out of the carton.
5. After unpacking the device, check it for damage. If there is any damage, contact the GRAVEDA® customer service immediately [info@graveda.de](mailto:info@graveda.de)
6. Make sure that all accessories are present
  - x 1 x GRAVEDA® GRASPRESSO® Rosin Press 5 tons GP40-5
  - x 1 x power cord
  - x 1 x air regulator
  - x 1 x instruction manual

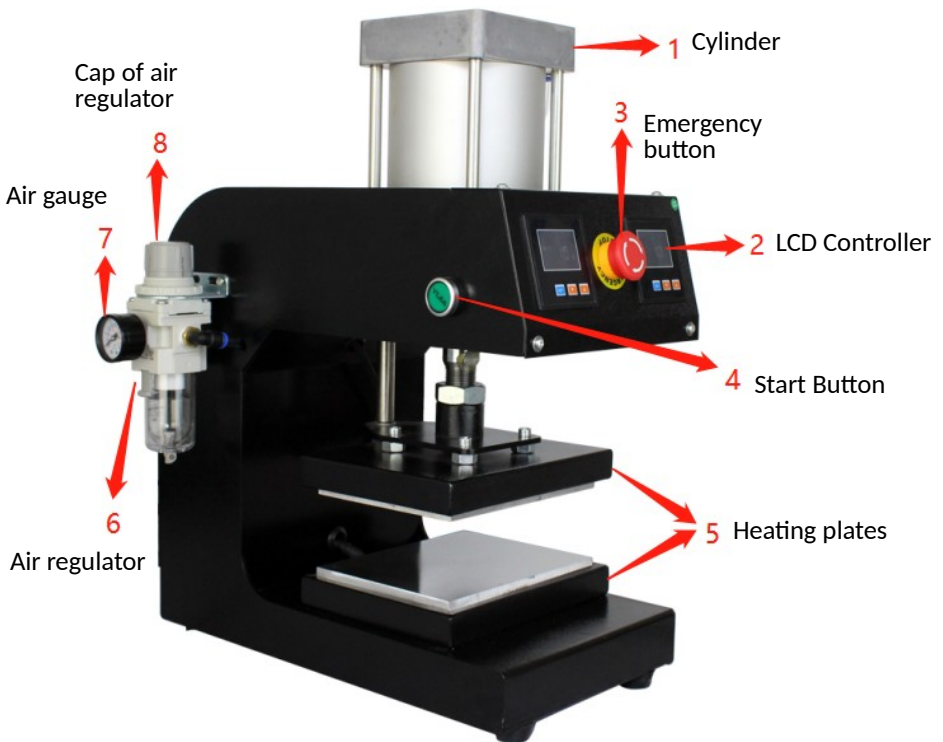

**NOT INCLUDED IN THE SCOPE OF DELIVERY!**

- x **You need an additional air compressor  
10 bar 1,5 – 2 PS**

This model is an pneumatic automatic model, high pressure, high efficiency and good return rate.

Check the voltage before using the device. The correct voltage is 220-240V/50Hz. Do not set the temperature higher than 235°C. The operating temperature ranges between 0°C and 235°C. You can set the temperature in degrees Celsius.

Insert the power plug into the unit. Insert the power plug into the power outlet. Turn the press on at the on/off switch. The control panel will now light up.

1. Make sure that the power plug is well connected to the outlet, then press the power button to turn on the unit.
2. connect the air compressor, adjust the air regulator to 0.4-0.6 MPa (pull the cap of The regulator up before adjustment, push the cap down when adjustment is complete). ***We do not accept any liability for damage or injury to you or third parties caused by incorrect use or connection of the press to your existing air compressors. We do not accept liability for damage to you or third parties caused by improper or incorrect or intentional misuse of the press.***
3. Set the temperature and time as desired
4. when the temperature has reached the previously set temperature the device beeps
5. Press the start button. The press closes automatically and starts the process.
6. The beep sounds again when the set time has elapsed, the plates are opened automatically.
7. If an emergency situation occurs, press the emergency button, the plates are lifted immediately and the machine switches off.
8. The press has an integrated fan. The fan starts automatically when the temperature of the heating plate reaches 80 °C (176 °F). It helps to reduce the temperature of the electrical parts and prolong the life of the press.

1. Press the setting button to access the temperature setting for the two heating plates. On the control panel, the temperature setting display page flashes.

2. Now press the "up" or "down" button to set the desired temperature.

3. Press the setting button again to enter the time setting mode. On the control panel, the time setting display page flashes.

4. Now press the "up" or "down" button to set the desired time in seconds.

5. After setting the time and temperature, you can close the press with the lever. On the control panel you will see a counter that shows the number of pressings so far.

6. Press the start/stop button. The press will automatically close and start the process and count backwards based on the previously set time. After the stopwatch has expired, you can carefully open the press. Press the Start/Stop button again. ATTENTION - the plates are hot! You can stop the timer beeping by pressing the timer button or restart the timer.

---

Place the prepared material in the middle of the lower plate.  
Use the lever (depending on the model) to push the cylinder upwards until the desired pressure is reached.

Wait until the countdown has expired and the press starts beeping.  
Press the Timer button again to turn off the timer and stop the beep.  
Open the press with the knob, lever or pressure release screw. (Depending on the model)

Never put your hands or fingers between the two heating plates! Danger of injury! Danger of burns! Never leave children unattended with the press!  
Remove the pressed material with heat-resistant gloves or tools and proceed extremely carefully.

Make sure that the heating plates have cooled down completely before cleaning. Clean the heating plates regularly. Apply a small amount of alcohol to a clean cloth and wipe the plates. It is best to use at least 80% isopropyl alcohol by volume.

Wipe the plates with a dry, clean cloth.  
Repeat these steps to clean all associated components.

Always switch off the Device when you no longer use the it!
