## CANNABINOIDS PROFILE

**Sample description:** PET CBD Oil 3%  
**Version:** Full spectrum MCT - Beef Flavour  
**Date of Analysis:** 13/09/2023

**Client:** ORIGENCBD  
**Test nr:** 033-1001.D  
**Batch nr.:** PFS.B3-0023

| CANNABINOID                        | Substance   | Result % p/p |
|------------------------------------|---|--------------|
| CBDV                               | Cannabidivarin  | ND           |
| CBDA                               | Cannabidiolic acid                                    | ND           |
| CBGA                               | Cannabigerolic acid                                   | ND           |
| CBG                                | Cannabigerol  | 0.12         |
| CBD                                | Cannabidiol   | 3.14         |
| THCV                               | Tetrahydrocannabivarin                                | ND           |
| CBN                                | Cannabinol  | ND           |
| $\Delta$ 9THC                      | $\Delta$ 9 Tetrahydrocannabinol                       | 0.14         |
| CBNA                               | Cannabinolic acid                                     | ND           |
| CBC                                | Cannabichromene                                       | 0.19         |
| THCA                               | Tetrahydrocannabinolic acid                           | ND           |
| CBCA                               | Cannabichromenic acid                                 | ND           |
|                                    |   |              |
| <b>CBD Tot</b>                     | <b>Cannabidiol total</b>                              | <b>3.14</b>  |
| <b><math>\Delta</math>9THC Tot</b> | <b><math>\Delta</math>9Tetrahydrocannabinol total</b> | <b>0.14</b>  |
| <b>CBG Tot</b>                     | <b>Cannabigerol total</b>                             | <b>0.12</b>  |

Footnote: ND =not detectable. The measured value was below the limit of detection of 0.01 % or 100 mg/kg. The expected measurement uncertainty varies with substance and concentration and can be assumed to be a maximum of 5 %. For the calculations of the equivalent sums, the respective acid forms were multiplied by the factor 0.877 or 0.878 to conclude the equivalent amount of the neutral form.

Method of analysis: HPLC-DAD (High Performance Liquid Chromatography - Diode Array Detector) Model: Agilent 1100
