

FERTILIZING SCHEDULE – AUTOMATIK

		GROWTH AND FLOWERING PHASES									
		Transplant into a pot with 15L of ZeroMix®									
WEEKS	GERMINATION IN SMALL POTS USING SEEDMIX® FOR 7 TO 10 DAYS	1	2	3	4	5	6	7	8	9	10
 LOMBRI COMPOST		Add 1,5kg for 15L of substrate									
 ALGUA MYCOR®		Add 150g for 15L of substrate									
 GUANODIFF AUTOMATIK		Add 150g for 15L of substrate									
 GUANODIFF BLOOM (10g/L)					Add 75g harrowing the substrate				Add 75g harrowing the substrate		
 GD BOOSTER			1ml/L every time you water the crops								

Adjust the dosages according to the volume of substrate used.

Use a growth substrate such as ZeroMix®. There is no need to enrich the soil more than indicated on this fertilizing schedule.

All the fertilizers on this chart can be used in organic agriculture as they comply with the European regulation standards (CE 834/2007). Pot volumes are only indicative.
